Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Elsa subscribes to a premium service with a base monthly cost, a service tax and an extra feature cost. Assist her in writing an inheritance program that takes input for these values and calculates the total monthly cost.

Refer to the below class diagram:

Input Format

The first line of input consists of a double value, representing the base monthly cost.

The second line consists of a double value, representing the service tax.

The third line consists of a double value, representing the extra feature cost.

Output Format

The output prints "Rs. X" where X is a double value, rounded off to two decimal places.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 10.0
2.5
5.0
Output: Rs. 17.50

Answer

```
import java.util.Scanner;

// You are using Java
import java.util.*;

// Base class for subscription
class Subscription {
    protected double baseCost;
    protected double serviceTax;

    public Subscription(double baseCost, double serviceTax) {
        this.baseCost = baseCost;
        this.serviceTax = serviceTax;
    }

    public double calculateMonthlyCost() {
        return baseCost + serviceTax;
    }
}

// Derived class for premium subscription with extra features
class PremiumSubscription extends Subscription {
    private double extraFeatureCost;

    public PremiumSubscription(double baseCost, double serviceTax, double
extraFeatureCost) {
```

```
        super(baseCost, serviceTax);
        this.extraFeatureCost = extraFeatureCost;
    }

    @Override
    public double calculateMonthlyCost() {
        return super.calculateMonthlyCost() + extraFeatureCost;
    }
}

public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        double baseMonthlyCost = scanner.nextDouble();
        double serviceTax = scanner.nextDouble();
        double extraFeatureCost = scanner.nextDouble();

        PremiumSubscription premiumSubscription = new
PremiumSubscription(baseMonthlyCost, serviceTax, extraFeatureCost);

        double totalMonthlyCost = premiumSubscription.calculateMonthlyCost();

        System.out.printf("Rs. %.2f%n", totalMonthlyCost);

        scanner.close();
    }
}
```
